GROUP NAME: Herd

AVERAGE LIFE SPAN: Up to 70 years

SIZE: Height at the shoulder, 8.2 to 13 ft

WEIGHT: 2.5 to 7 tons

SIZE RELATIVE TO A 6-FT MAN:

About the African Elephant

African elephants are the largest land animals on Earth. They are slightly larger than their Asian cousins and can be identified by their larger ears that look somewhat like the continent of Africa. (Asian elephants have smaller, rounded ears.)

Trunks and Tusks

Elephant ears radiate heat to help keep these large animals cool, but sometimes the African heat is too much. Elephants are fond of water and enjoy showering by sucking water into their trunks and spraying it all over themselves.
